Petite White Orchid

Often called the beginner orchid or 'moth orchid', the popular pet-friendly Phalaenopsis orchid is one of the easiest varieties of orchids to grow as a houseplant.

Pink Anthurium

Anthuriums are the world's longest blooming houseplant – they are rarely without their showy blooms! Each bloom can last up to eight weeks, and new ones will pop up often.

Fuchsia Orchid

This makes a beautiful and long lasting gift. The pet-friendly orchid is one of the easiest to grow as a houseplant, and indoors, it will typically bloom about once a year, for up to three months.

Echeveria Preta

The Echeveria is known for its iconic rosette-shape, succulent nature, and pet-friendliness. Its fleshy water-storing leaves means it can survive on little more than sunshine. This variety is a dark purple black hue. It comes potted in your choice of earthenware planter.
